

Note

The managers of the various departments have all lately returned from New York, and are full of the latest-moment styles as seen in the best stores, the theaters and at social functions. Their latest purchases downtown, in the wholesale market, amount to nearly one hundred thousand dollars, among which are not a few good "specials." Note that the Palais Royal definition of a "special" is an article of unusual merit offered at considerably less than the actual value. This page of "Specials" earns careful reading, and a critical visit to this establishment. Open until 6 p.m.

DEPARTMENT MANAGERS' SPECIALS

THE PALAIS ROYAL

Learn

The manager of a department may be compared with the little merchant of the decade before the advent of the department store. Learn that the income of the manager is generally greater than accrued to the little store proprietor; learn that, being relieved of the office duties, he or she is entirely free of financial responsibility and in more comfortable circumstances than was the little store proprietor. Learn that the Palais Royal supports seventeen of these managers, and that the store is practically seventeen stores in one, a combination eliminating much expense, enabling lowest possible prices, proving an inestimable benefit to the community.

The manager of this department presents a list of Silks, Wool Fabrics and Linings, which are claimed to be offered at less than New York prices. Not only are the latest and most approved fashion plates here, but in all departments will be found well-informed and polite attendants, whose services will help lighten the responsibility of selecting material for a new dress with the various trimmings and sewing needs.

Dressmakers and every user of Spool Cotton are earnestly invited to join John J. Clark and the Palais Royal in the fight against "The Trust," which demands that Spool Cotton be retailed at 6c per spool.

The manager of the department for Suits, Coats and other ready-to-wear garments reports the purchase of a New York maker's sample garments, among which are "gems," imported from Paris, London and Berlin. They have answered their purpose as inspirations, and were bought and will be sold at fractional prices.
